

Distributed Digital Preservation: Technical, Sustainability & Organizational Developments

Tyler Walters
Liz Bishoff
Mark Jordan
Thomas Wilson
Emily Gore

Who are we?

- Tyler Walters, Associate Director for Technology & Resource Services, Georgia Tech representing MetaArchive Cooperative
- Liz Bishoff, Director of Digital & Preservation Services, BCR
- Mark Jordan, Systems Division Head, Simon Fraser University, representing COPPUL
- Thomas Wilson, Associate Dean for Library Technology, University of Alabama, representing ADPNet
- Emily Gore, Head of Digital Curation & Technology Services, Clemson University representing MetaArchive Cooperative

What is distributed digital preservation?

- Just what you think – preservation systems where a network of nodes performing preservation actions exist at geographically dispersed locations
- In our panel, all of the speakers participate in Private LOCKSS Networks (PLNs) but other distributed preservation networks exist, i.e. Chronopolis based on SRB
